

CRYSCALC

how to get help?

CRYSCALC user's manual (text or HTML format) can be created by **CRYSCALC** itself with the following instructions respectively:

```
d:\>crystalcalc man
```

```
d:\>crystalcalc man_html
```

Remarks

- If a browser has been defined in the `crystalcalc.ini` setting file, the HTML file is directly opened by the browser.

[EXTERNAL APPLICATIONS]

```
browser = "c:\Program Files (x86)\Mozilla Firefox\firefox.exe"
```

- MAN and MAN_HTML can be replaced by HELP and HELP_HTML
- Into **CRYSCALC**, user's manual can also be created, using the same `MAN/HELP` and `MAN_HTML/HELP_HTML` keywords.
- `KEYS` and `KEYS xx*` keywords allow to list all the keywords or only keywords containing `xx` string respectively.
